ISLAM OMAR

Back-End Developer

Email: islam3marahmed@gmail.com | LinkedIn: linkedin.com/in/islam-omar-3ba867266 | Portfolio: islam3mar.github.io/portfolio
Location: Cairo | Mobile: +201036272141 | Military Service: Postponed

OBJECTIVE

Results-driven Back-End Developer specialized in the .NET ecosystem, with hands-on experience building production-ready RESTful APIs using ASP.NET Core, Clean/Onion Architecture, and Entity Framework Core. Skilled in SOLID principles, design patterns, and secure authentication (JWT, Identity), proven across four end-to-end projects and an industry internship. Seeking a Junior Back-End Developer role to deliver immediate value while growing deeper into the .NET ecosystem.

WORK EXPERIENCE

Back-End Developer Intern (.NET MVC) | *Sep 2026* | *Pioneers Solutions, Shebin El Kom, Monufia*

- Worked as a Back-End Developer using ASP.NET Core MVC in a live production environment on real-world applications.
- Applied .NET MVC concepts, database integration, and back-end best practices under professional guidance.

EDUCATION

Menofia University – Faculty of Science (Physics & Computer Science) | Class 2021–2026 | GPA: Very Good (84%)
Bachelor Thesis: Kon Sanad Charity Management System (Grade: A+)

PROJECTS

1. Gym Management System | *Jun 2026 – Jul 2026* | *ASP.NET MVC | Route Academy*

- Full-stack web app using 3-Tier Architecture, Generic Repository Pattern, Identity-based Auth, and role-based dashboards for admins/members with session scheduling and subscription management.
- Built a session booking system where members can book sessions, trainers can mark attendance or cancel bookings, all backed by a service layer with Repository and Unit of Work patterns.
- Set up role-based auth (Admin/Trainer/Member) using ASP.NET Core Identity, with AutoMapper for model/view mapping.

Repo: github.com/Islam3mar/GymSystemMVC

2. E-Commerce RESTful API | *Jul 2026 – Aug 2026* | *ASP.NET Core | Route Academy*

- Production-ready API with Onion Architecture, AutoMapper, JWT Auth, Redis Caching, Stripe Payment, Swagger docs, SOLID Principles, Unit of Work, and Fluent Validation.
- Added Redis caching to speed up product retrieval, and built filtering/sorting/pagination for products and orders using the Specification pattern.
- Implemented secure user login with JWT authentication, and integrated Stripe to handle online payments during checkout.

Repo: github.com/Islam3mar/ECommerceAPI

3. Kon Sanad Charity Management System | *Sep 2025 – Jul 2026* | *ASP.NET Core Web API | Graduation Project*

- Role-based API for 5 roles (Manager, Volunteer, Beneficiary, Donor, Admin) with Clean Architecture, JWT Auth, background notifications, donation pipelines, warehouse management, and KPI dashboard.
- Built real-time notifications with SignalR and Redis, plus a background job that alerts users about campaigns nearing their end date.
- Developed a PDF reporting module for donors, donations, and beneficiaries, powering a dashboard with key statistics.

Repo: github.com/ahmed-samir10/GraduationProject

4. HR Management System (HRMS) | *Sep 2026* | *ASP.NET Core MVC | Pioneers Solutions Internship*

- Built an HR system from a written SRS using Clean Architecture, Repository/Unit of Work/Specification patterns, FluentValidation, and AutoMapper, with strict rules (National ID vs. birth date/governorate, phone, age).
- Implemented page-level permissions (View/Add/Edit/Delete) via a custom authorization filter, with cookie auth, BCrypt hashing, and AES encryption for sensitive employee data.
- Developed attendance with Excel import/export (ClosedXML) and month locking, plus dynamic payroll (absences, late hours, overtime, holidays) with approved payslips stored as snapshots.

TRAININGS

Back-End Development Diploma (.NET Track) | *Dec 2025 – Jul 2026* | *Route Academy*

- Intensive diploma covering the full .NET back-end stack (C#, OOP, LINQ, SQL Server, EF Core, MVC & Web APIs), SOLID, and Agile with Azure DevOps.

Additional: Web Development & Intro to Programming/OOP – CaptainDev, AWS Academy Cloud Foundations, Data Structures & Algorithms.

TECHNICAL SKILLS

Languages & Frontend: C#, SQL, HTML, CSS, JavaScript, Bootstrap (currently learning Angular)
Frameworks & Libraries: .NET Core, ASP.NET Web API, ASP.NET Core MVC, Entity Framework Core, AutoMapper, Fluent Validation, Fluent API
Tools: Visual Studio, Postman, Swagger, Git, GitHub, SSMS, Azure DevOps | Testing: API Testing (Postman, Swagger), Manual Testing
Concepts: OOP, Clean/Onion Architecture, Repository, Unit of Work, Specification, RESTful APIs, JWT, Identity, SOLID, LINQ

LANGUAGES

Arabic: Native | English: Professional Working Proficiency (B2 – Upper-Intermediate)
