Mobile: +201036272141 | Military Service: Postponed

OBJECTIVE

Back-End Developer specialized in the .NET ecosystem, with 2 years of freelance experience delivering web applications for clients and hands-on experience building production-ready RESTful APIs using ASP.NET Core, Clean/Onion Architecture, and Entity Framework Core. Skilled in SOLID principles, design patterns, and secure authentication (JWT, Identity), proven across four projects and an internship. Seeking a Junior Back-End Developer role to deliver real value while growing within the .NET ecosystem.

WORK EXPERIENCE

Back-End Developer Intern (.NET MVC) | *Sep 2026* | *Pioneers Solutions*

- Built the back-end of an HR system and a billing system (ASP.NET Core MVC) from a written SRS, owning features end to end under code review.
- Fixed deleting employees who have payroll history without losing data: added soft delete (deactivate/reactivate) to keep records for audits.
- To ensure on-time payments, built a MailKit BackgroundService for due-date/overdue reminders, with catch-up logic after downtime.
- Limited credit risk with per-client credit limits (blocks over-limit bills, warns at 90%) and idempotent Stripe webhooks against double payments.

Freelance Full-Stack Developer (Frontend & Backend) | *Oct 2024 – Present* | *Remote*

- 2 years of freelance experience delivering web applications for clients, covering both frontend and backend.
- Delivered projects on time with a focus on performance, scalability, and clear client communication.

EDUCATION

Minufiya University, Egypt – Faculty of Science (Physics & Computer Science) | Bachelor of Science (B.Sc.) | Class 2021–2026 | GPA: Very Good (84%)
Bachelor Thesis: Kon Sanad Charity Management System (Grade: A+), a role-based platform for managing charity campaigns, donors, and beneficiaries

PROJECTS

1. Bills System | *Oct 2026 | ASP.NET Core MVC | Pioneers Solutions Internship*

- Built a billing system (clients, bills, credit limits) using Clean Architecture, Repository/Unit of Work/Specification, and FluentValidation.
- Integrated Stripe Checkout with secure webhooks (signature verification, idempotent processing, refund and dispute handling).
- Generated Arabic/English PDF invoices (QuestPDF) and a MailKit BackgroundService for due-date/overdue reminders.

Repo: github.com/Islam3mar/BillsSystem | Live: bills.runasp.net

2. HR Management System (HRMS) | *Sep 2026 | ASP.NET Core MVC | Pioneers Solutions Internship*

- Built an HR system from a written SRS using Clean Architecture, Repository/Unit of Work/Specification patterns, FluentValidation, and AutoMapper.
- Implemented page-level permissions (View/Add/Edit/Delete) via a custom authorization filter, with cookie auth, BCrypt hashing, and AES encryption for sensitive data.
- Developed attendance with Excel import/export (ClosedXML) and month locking, plus dynamic payroll with approved payslips stored as immutable snapshots.

Repo: github.com/Islam3mar/HRMS | Live: hrmsapp.runasp.net

3. Kon Sanad Charity Management System | *Aug 2025 – Jul 2026 | ASP.NET Core Web API | Graduation Project*

- Built a role-based API (5 roles) with Clean Architecture and JWT, covering donations, warehouse management, and a KPI dashboard.
- Implemented real-time notifications with SignalR and Redis, plus a background job alerting users about campaigns nearing their end date.
- Developed a PDF reporting module for donors, donations, and beneficiaries.

Repo: github.com/ahmed-samir10/GraduationProject | Live: kon-sanad-whbi.vercel.app

4. E-Commerce RESTful API | *Jul 2026 – Aug 2026 | ASP.NET Core | Route Academy*

- Built an API with Onion Architecture, AutoMapper, FluentValidation, Unit of Work, and Swagger docs.
- Added Redis caching for product retrieval, plus filtering/sorting/pagination using the Specification pattern.
- Implemented JWT authentication and Stripe payment integration for the checkout flow.

Repo: github.com/Islam3mar/ECommerceAPI

TRAININGS

Back-End Development Diploma (.NET Track) | *Dec 2025 – Jul 2026* | *Route Academy*

- Intensive diploma covering the .NET back-end stack (C#, OOP, LINQ, SQL Server, EF Core, MVC & Web APIs), SOLID, and Agile with Azure DevOps.

Additional: Web Development & Intro to Programming/OOP – CaptainDev, AWS Academy Cloud Foundations, and Data Structures & Algorithms.

TECHNICAL SKILLS

Languages & Frontend: C# (.NET), T-SQL, HTML5, CSS3, JavaScript (ES6), Bootstrap, jQuery, responsive web design (currently learning Angular)
Frameworks & Libraries: .NET Core, ASP.NET Web API, ASP.NET Core MVC, Entity Framework Core, AutoMapper, Fluent Validation, Fluent API, Redis
Tools: Visual Studio, Postman, Swagger, Git, GitHub, SSMS, SQL Server, Azure DevOps | **Testing:** API Testing (Postman, Swagger), Manual Testing
Concepts: OOP, Clean/Onion Architecture, Repository, Unit of Work, Specification, RESTful APIs, JWT, Identity, SOLID, LINQ, Dependency Injection

LANGUAGES

Arabic: Native (Mother Tongue) | English: Professional Working Proficiency (B2)
